Learning objectives of the Course

The Course is aimed at beginners in neonatal brain US scanning and it is organized offering both frontal lectures and practical sessions.

The aim of the Course is to give an introduction to the exciting world of ultrasound imaging.

During the day attendees will learn the fundamentals of US physics, the probe skills to optimize an US image and the different functionalities of the ultrasound system.

The Course will give each participants the opportunity to get “hands-on” sessions with the machines and to use it to scan and fix in an image the basic structures of the “normal” neonatal brain.

The main goal of the Course is to build an open “dialogue” between teachers and participants, in order to learn practically the guidelines for brain ultrasonography.

The theoretical lessons will be connected with the didactic programme of the following Course “2020 Neonatal Ultrasound Course. Why, how and when an ultrasound image?” which will be held on 27-30 October, 2020 in Florence, Italy, where many “pathologic” images of the neonatal ultrasonography will be treated extensively.

The Director of the Course
Dr. Antonio La Torre

Lecturers
Dr. Antonio La Torre
Neonatology Department, AUO Careggi Hospital, Florence, Italy

Prof. S. Monica Epelman
University of Central Florida and Florida State University
Department of Medical Imaging - Radiology
Nemours Children’s Hospital
Orlando, USA

Prof. Michael Riccabona
Department of Radiology
Division of Paediatric Radiology
University Hospital LKH, Graz, Austria

AIM Education
Via G. Ripamonti, 129
20141 Milano

Monday, 26 October

PROGRAMME

8.30-9.00  Introduction: the anatomy of the brain
Dr. Antonio La Torre

9.00-9.40  US Physics: what is it, how does it work?
A talk together
Dr. Antonio La Torre

9.40-10.15 Transducers and their properties
A talk together
Dr. Antonio La Torre

10.15-11.00 Neuroultrasonography: in pursuit of an optimized examination. Coronal and sagittal planes. The main points of view: anterior and posterior fontanel, mastoid fontanel
Prof. S. Monica Epelman

11.00-11.15  COFFEE BREAK

11.15-12.15  *First practical session:
the technical properties of US machine,
the basic rules of a good exam

12.15-13.00  Ischaemic encephalopathy and the normal hyperechodensity-cystic-lesions
(normal and abnormal)
Prof. S. Monica Epelman

13.00-14.15  LUNCH

14.15-14.45  Neonatal Cerebral hemorrhage
Prof. S. Monica Epelman

14.45-15.30  Doppler Sonography in neonatal neurosonography:
physics, basics and typical applications/findings
Prof. Michael Riccabona

15.30-16.30  *Second practical session:
An US exam by alone…print your images!

16.30-17.30  *Tests for the participants in small groups:
What is the diagnosis?

17.30-18.15  The cerebral ventricles: the normal and the pathology (hydrocephalus)
Prof. Michael Riccabona

18.15-18.30  Questions and Answers
CME Test

GENERAL INFORMATION

Course Venue  Palazzo Ricasoli Polihotels
Via delle Mantellate, 2 - Florence, Italy

Registration fee  by 18 September 2020  by 20 October 2020
(€ 490,00  € 590,00)

No on site registration.
The fee includes: course materials, a CD with the lessons, coffee break and light lunch.
The Course that will be held on October, 26th 2020 is limited to 18 participants. The Organizing Secretariat will confirm the registration to the first 18 participants.
In order to submit your registration and/or hotel reservation, please open the page:

web.amgroupinternational.com/2020/ultrasound

UEMS – European Union of Medical Specialist
UEMS credits will be applied for. They are valid all over Europe, the United States and Canada (reciprocity agreement with the American Medical Association).

CME  Continuing Medical Education
(for Italian Participants only)
CME credits, requested to Ministry of Health, will be given to the participants of the Course.

* The lecturers of the practical sessions are: S.M. Epelman, A. La Torre, M. Riccabona
